

## More Time for Donors. Less Time Managing Technology.

Spend Less Time Managing Infrastructure.  
Spend More Time Advancing Your Mission.

Your ministry depends on StudioEnterprise and StudioOnline every day to manage donor relationships, fundraising campaigns, events, memberships, sponsorships, and mission-critical operations. But maintaining the technology behind those activities shouldn't compete with the work that matters most.

DonorDirect Managed Cloud Hosting delivers the full functionality you rely on in a professionally managed environment, reducing IT complexity, improving reliability, and freeing your team to focus on donor relationships and your mission.

### Is Your Ministry Spending Too Much Time Managing Technology?

If any of these challenges sound familiar, Managed Cloud Hosting may be the right next step.

- Your IT team spends too much time maintaining servers and infrastructure.
- Hardware upgrades or server replacements are becoming unavoidable.
- Backups, security updates, and system monitoring consume valuable internal resources.
- Your staff needs secure, reliable access to donor data from anywhere.

### Everything You Rely On. Nothing Left Behind.

Moving to Managed Cloud Hosting doesn't mean giving up the capabilities your ministry relies on. You keep the full functionality you depend on, without the burden of managing the infrastructure.

- Complete StudioEnterprise and StudioOnline functionality
- Unlimited donor records, workflow automation, and advanced reporting
- Multi-company, multi-currency, event, membership, and sponsorship management
- Secure access from desktop, tablet, and mobile devices

### Why Ministries Choose Managed Cloud Hosting

#### Focus More on Your Mission

Reduce the burden of infrastructure management so your team can spend more time engaging donors, supporting fundraising efforts, and serving your constituents.

#### Dependable Operations

Rely on a professionally managed hosting environment that delivers the security, reliability, and availability your mission depends on.

#### Simplify Technology Management

DonorDirect manages the hosting infrastructure while providing direct access for faster troubleshooting and support, reducing demands on your internal IT team.

## Compare The Difference

| Managing On-Premises           | Managed Cloud Hosting                         |
|--------------------------------|-----------------------------------------------|
| Maintain servers               | DonorDirect manages infrastructure            |
| Plan hardware refreshes        | Professionally managed environment            |
| Monitor backups and security   | Hosting managed for you                       |
| Coordinate support access      | Faster issue resolution through direct access |
| Spend time maintaining systems | Spend more time serving donors                |

### A Different Way to Think About Cloud Hosting

The real value of cloud hosting isn't technology, it's time. Managed Cloud Hosting removes the burden of infrastructure management, freeing your team to focus on donor relationships, constituent engagement, and mission impact.

### Is Managed Cloud Hosting Right for You?

Managed Cloud Hosting is ideal for ministries that want to:

- Reduce the time and complexity of managing IT infrastructure.
- Avoid costly hardware refreshes and make technology management more predictable.
- Free staff to focus on donors, constituents, and mission impact.

### Cloud hosting isn't just a technology decision.

It's an opportunity to give your team more capacity for the work only they can do, building relationships, inspiring generosity, and advancing your mission.

### Technology vs. Mission

Maintaining infrastructure

Building donor relationships

Managing servers

Growing fundraising

Solving IT issues

Advancing the mission

### Ready to Spend Less Time Managing Technology?

Schedule a Managed Cloud Hosting Assessment.

We'll review your current environment, discuss your technology goals, and help determine whether Managed Cloud Hosting is the right fit for your organization, so your team can spend more time supporting donors and advancing your mission.
